

Baby boy christening shoes

Here is my step by step baby boy shoe cake topper tutorial, it can be made with **fondant** or gumpaste.

Step 1

Roll out fondant or gumpaste and cut out all pieces using the template as your guide.

Make sure you turn the sole template around before cutting the second shoe, so you have "left" and "right" shoes.

Step 2

Using your quilting wheel, create a stitching pattern on the front piece.

Tip: If you don't have such tool you can use a butter knife or even a lemon scraper to create the same look

Tip: Before gluing your pieces together let them air out for about 15minutes, this will harden your fondant and make it easy to work with.

Step 3

Brush the edge of the baby sole shoe with edible glue and attach both pieces together.

Tip: If you don't have edible glue use simply water (water will act as glue with fondant)

Step 4

Align your paper template on top of your fondant and using the back of a paint brush press down each dot. Then, with a straw press down to create holes by using the dots as a guide line.

Step 5

Using your quilting wheel, create a stitching pattern on the front piece.

Step 6

Attaching the back of the shoe

Brush the edge of your back piece(#3) with water or edible glue and attach it to your sole and front piece. (see picture)

Step 7 Making the laces

Cut 2 stripes of fondant and glue them on each side with water. Using a pointy tool, make sure to put the laces inside each holes. (this will create a realistic look)

Step 8 Making the loop

Fold in half a long strip of fondant or gumpaste. Glue it to the middle of your laces created on step 7.

Step 9

Cut a thin strip of fondant and gather each end in the middle and squeeze. Glue your loop to your laces

Step 10

Glue silver sugar pearls following the shape of a cross with edible glue.
