

## Baby crocs shoe cake topper

Here is my step by step baby crocs shoe tutorial, followed by a video. It is a perfect cake topper for a baby shower cake, birthday cake... This cake decoration topper can be made with **fondant** or gumpaste.

### Step 1

Roll out **fondant** or gumpaste and cut out all your shoe pieces using the baby crocs shoe template as your guide. **Click here for the template**

\*\*\*Make sure you turn the template around before cutting the second shoe, so you have "left" and "right" shoes.\*\*\*

### Step 2

Making the sole

Using any round shape tool, create creases on each side of your sole. (You may use the end of a big brush)

### Step 3

With a pointy tool create deep creases all around your sole (see template for more detail) When finished, turn your piece around before doing step 4. (the creases should face down)

### Step 4

Using your fondant roll pin, make a deep crease on your sole to create the heel of your shoe.

### Step 5

Cut piece #2 using your template. Align your paper template on top of your fondant and using a pointy tool press down each dot.

Tip: if you don't have such tool, the back of a paint brush will work just fine.

Then, with a straw press down to create holes by using the dots as a guide line.

### Step 6

Create a stitching pattern using your quilting wheel.

**Tip:** If you don't have such tool you can use a butter knife or even a lemon scraper to create the same look.

### Step 7

Glue #2 piece to your sole using a little bit of edible glue or water.

**Tip:** Before gluing your pieces together let them air out for about 15 minutes. This will harden your fondant and make it easier to work with.

### Step 8

Making the front of the shoe

Cut piece # 3 and follow the same steps as 5-7

### Step 9

Making perfect holes

Use the dots that you have already created as a guideline and create holes using a straw.

### Step 10

Using your quilting wheel, create a stitching pattern.

### Step 11

Shape the front of your shoe piece by gently bending it in the middle. Then, using a little bit of water glue piece #2 with #3.

### Step 12

Cut piece #4 and glue it on each side of your shoe by brushing a little bit of edible glue or water.

### Step 13

Glue a decorative piece of your choice to each side of your shoe.
